Subject: Request to Start Researching the Annexation Process of a few Strawberry Lodge Mutual Water Company's Customers

The District was approached by Mark Mazakas, Board President and General Manager of Strawberry Lodge Mutual Water Company.

Excerpt from email:

"On a separate note, we have a few properties in our system that we would like to offer to annex to your system. Is this possible and how would I start that process?"

Staff Recommendation : The District has water main at 1 of these homes and performing a new tap would be an easy task as we already service every other home on that street. The other homes in question would require more research as to how we would deliver water. A new Zone and Tank would possibly be required. It is staff recommendation to begin with a conversation with Strawberry Lodge Mutual Water Company to discuss their goal.
